## PROFESSIONAL EXPERIENCE

### SOFTWARE DEVELOPMENT ENGINEER

 HONEYSYS, BANGALORE

Jan 2023 to Present, On-site

- Dynamic Table Implementation, akin to the functionality offered by the third-party library Ag-Grid using React and Redux.
- Optimized and rewrote many modules of the e-commerce (using Next, Redux, and Typescript) and admin site (using React, Redux, Webpack, and Typescript).
- Designed and developed customizable food item features, akin to the options offered by leading platforms like Zomato and Swiggy using React.
- Implemented drawers for enhanced user interaction.
- Implemented customizable admin settings for various e-commerce, and admin platforms using redux for handling many clients.
- Implemented access and refresh tokens through global middleware using JWT.
