PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER

HONEYSYS, BANGALORE

Jan 2023 to Present, On-site

- Designed and implemented dynamic table (like third-party library Ag-Grid) for sorting, selecting rows, customizing columns, changing page and page sizes, and downloading table data in Excel format.
- Designed and implemented drawers while editing orders, customers, and global products in super and store admin for a good user experience.
- Designed and implemented Admin-UI-Setting for changing the color, logo, image, and name of store, super, and e-commerce. So many clients can be handled easily.
- Designed and Implemented Business Units (many businesses) in super admin So one client can handle many businesses (like Grocery, Pharmacy, and many more).
- Designed and implemented configurable food items (like in Zomato and Swiggy) where users can have more options and varieties.
